

GP.CSV

Description:

GP branches in England.

Contains:

Name, address and contact details for GP branches in England.

This file contains a list of active GP branches. The data is aligned with ODS GP data. The IsEPSEnabled column indicates where an electronic prescription service is available at the branch.

How Maintained:

Data contained in the report is obtained from various sources. NHS Choices has provided the functionality that allows GP practices to access their profiles using our Provider Information Management System (PIMS) to update the information we hold about them. GP practices that have taken up this privilege are able to update their profiles. In some instances, some parent organisations inform us when changes occur. We regularly use ODS reports to update our data.

Code Formats:

ODS code format is used to identify the GP branches.

The character “~” has been used as delimiter on this file to factor in possible commas within cells.

File Format:

Column	Field Content	Size	Mandatory	Notes
1	OrganisationID		Yes	Internal unique Identification
